SUMMARY

I have successfully completed my Bachelor of Computer Applications (BCA) from Arya PG College. I possess strong foundational knowledge in PHP with Object-Oriented Programming (OOPs), MySQL, and the Laravel framework. During my academic journey, I gained practical experience by developing multiple projects, including a Car Rental System and a School Management System with full CRUD (Create, Read, Update, Delete) operations. I am passionate about web development and continuously working to enhance my skills in building efficient, scalable, and user-friendly applications.

WORK EXPERIENCE

FRESHER

PROJECTS

Car Rental System – Project Summary

Developed a Car Rental System using PHP with features like user authentication (Login, Signup, Forgot Password with OTP via PHPMailer). The system includes separate dashboards for Users and Car Owners. Users can browse and book cars, and receive email notifications upon successful booking. Car Owners can add, view, update, and delete cars, as well as monitor user bookings and booking history. The project demonstrates strong implementation of CRUD operations, email integration, and role-based access**.**

School Management System – Project Summary

Developed a School Management System using PHP with Object-Oriented Programming (OOPs) concepts. The system includes core features like adding, updating, and deleting student records. It supports a role-based structure where the Principal (Admin) manages the system and can assign limited access roles such as teachers. Teachers can manage student-related activities like adding fees, while the Principal has full control over the system, including viewing complete details of students and teachers through structured modules. The project focuses on implementing CRUD operations, OOP principles, and basic role management in a real-world scenario.

EDUCATION

Bachelor of Computer Application **Jan 2023 - Feb 2025**

Arya Perfect Graduate College Jaipur

- Bachelor of Computer Application
- Final Year Per: 74.84%

KEY SKILLS

- Core PHP
- Oops
- Mysql
- HTML
- CSS(Basic)
- Data Mining , Cleaning
- Relationship Management
- MS Office
